

Video photography is used at this event

To improve your experience, Olly Timing is being used at this event.

Olly Timing is the first of a new generation of swimming timing system. It uses computer vision based artificial intelligence to “see” swimmers touch the wall at the end of their races, without touchpads or timekeepers.

Swimming NSW has validated Olly Timing for official times except State records.

Child protection

Olly Timing uses video photography. Cameras are located above and/or beside the ends of the pool.

Competitors will be videoed for the purposes of timing and may also be used for other officiating purposes.

Videos are stored on Olly Timing equipment. Competitors’ times, events and heat numbers will be stored with the videos, but not their names.

The data is accessible by swimming club officers, event technical officials, and Olly Timing staff. The data will be deleted 6 months after the event.

Olly Timing staff attending this event have valid NSW Working With Children accreditations. Olly Timing adheres to all requirements under the Privacy Act 1988.

Use of Olly Timing reduces the number of people on pool deck with direct access to competitors.
